Alpert Medical School of Brown University:

Academic Clinician, Allergy and Clinical Immunology

The Division of Allergy and Clinical Immunology in the Department of Pediatrics and Medicine at the Alpert Medical School of Brown University is seeking a dedicated clinician educator at the Instructor or Assistant/Associate Professor level with expertise in the evaluation of pediatric allergic and immunologic diseases including primary immunodeficiency disorders. This is a full-time position that will include primary out-patient responsibilities as well as in-patient consultations. The successful candidate will teach clinical fellows, medical residents, and medical students.

The candidate must hold a MD degree, be board certified in Pediatrics and/or Internal Medicine and board eligible/certified in Allergy and Immunology. This is an outstanding opportunity to take a leading role in patient care, teaching, and the clinical research missions related to the expanding Allergy and Clinical Immunology practice at Rhode Island Hospital.

We seek candidates who embrace diversity and reflect diversity in the broadest sense. Rhode Island Hospital/Hasbro Children Hospital is an equal opportunity, affirmative action employer.

Interested individuals should submit current CV and a cover letter to:
