Position available: Medical Director, Early Clinical Development, gRED, South San Francisco

Job Description:

Medical Director, Early Clinical Development, gRED, South San Francisco
The Early Clinical Development (ECD) team at Genentech is seeking a talented Physician Scientist for research focused on allergy, respiratory and fibrosis indications. The Medical Director will design clinical studies and develop protocols for review and discussion, act as a medical monitor, and provide clinical support across all relevant studies and programs. ECD oversees a broad portfolio and drives development from first-in-human studies through proof-of-concept and decision-making regarding initial pivotal studies. The Medical Director will join a development team responsible for the design, implementation, monitoring, analysis and reporting of studies conducted within the program.

M.D. Required, M.D./Ph.D. is desirable
Board Certified or Eligible in Pulmonary, Allergy-Immunology, Rheumatology, or Nephrology
Able to effectively communicate with external experts and communicators
Pharma Industry experience is a plus
