Job Description:
Senior Medical Director, Medical Affairs, Dupixent Respiratory
Tarrytown, NY, United States
Our medical affairs physicians and scientists are experts on our medicines and form an extremely valuable part of our global development organization. We serve as an important liaison between Regeneron and the scientific and healthcare community. Medical Affairs is organized in an optimally aligned matrix structure for delivery of therapeutic and functional area expertise. The Senior Director will lead a multifunctional Medical Product Team (MPT) with global and US focused deliverables, within a matrix organization, consisting of colleagues within the medical affairs group (including field medical, medical operations, medical education, medical information, HEOR, publication management and medical statistics). The Senior Director will represent Regeneron medical affairs and ensures alignment working closely with research & development, commercial, access & reimbursement, and patient advocacy colleagues. He/she will also represent Regeneron towards external collaborators such as health care practitioners, research groups, payers and alliance partners. More information:
